

SUMMARY

Product designer with 14+ years designing enterprise and consumer products, plus two years of research. During four years at Meta, designed Pixel and Conversions API integrations, data-quality diagnostics, and Dataset migrations; led Signals design for Meta AI Business Assistant's MVP and Omnichannel Ads' GA launch. Built two company-wide design systems and co-invented a text-to-prototype workflow with published paper and patent. Now building AI products at Empathie.
